Strike Line — How to Play

Goal

Two teams of five. Attackers (orange) carry a charge and must plant it on site A or B. Defenders (blue) must stop the plant, defuse a planted charge, or run out the 90-second clock. First team to 8 round wins takes the match.

Controls (phone)

Left thumb: drag anywhere on the left half to move.

Right thumb: drag on the right half to aim; the gun fires while you aim.

Orange button: appears on a site (attacker with the charge) or next to a planted charge (defender). Hold it: 3 seconds to plant, 5 seconds to defuse.

Keyboard on desktop: WASD move, E plant/defuse.

Rounds and money

Each round starts with 2.5 seconds of buy time. Tap **Buy** for an SMG ($1200), Rifle ($2700) or Armor ($650). Winning pays $3250, losing pays $1400 plus a loss-streak bonus, and each kill pays $300. Survive the round to keep your gear.

If the charge carrier falls, the charge drops and any attacker can pick it up by walking over it.

A planted charge detonates after 40 seconds, destroying everyone within its red ring.

Tips

Enemies only appear when someone on your team can see them, so move as a group.

Rifles hit hardest and most accurately; armor halves incoming damage until it wears down.

The beeping speeds up as the charge nears detonation.
